

T835H-8A 8A TRIAC

Rev.A.1.1

The T835H-8A triac is suitable for general purpose AC switching. It can be used as an ON/OFF function in applications such as lighting regulation, induction motor starting circuits, and speed control operation in light dimmers, motor speed control. Compared to traditional triacs, T835H-8A provides very high switching capability up to junction temperature of 150°C. By using an internal ceramic pad, T835H-8A has a rated insulation voltage of 2500 VRMS, compliant with UL standards (File ref: E252906). Package TO-220 is RoHS compliant.
